**SB 990**

I cannot imagine any of the nice people in your state are making an effort to force people back to smoking now that they have switched to e-cigs. Certainly their families are very proud of them for quitting smoking and want them to continue to vape instead of smoking.

In addition, they no longer create cigarette butts, and second-hand vapor is as safe as sitting next to someone eating. Trying to eliminate smokeless alternatives that we are using to save ourselves, effectively makes us (and our children and grandchildren who are exposed to our smoke, butts, and fire danger) go back to analog cigarettes. I can breathe better, my children and grandchildren need me, and they are safer around me, now that I have quit smoking by using e-cigs – please do not add momentum to the movement to force me back to combustible cigarettes. This is not smoking it is water vapor so it is silly to not let them be used any place.

I have not smoked in well over a year now. My Dr. is very happy my family is very happy.

Please do not pass this bill.
